New Display

We invite you to check out the new display case in the VPTH hallway that celebrates the diversity and multicultural background of the people in our department. It features a world map with notes from CPB faculty and graduate students on their village/city/region of origin. Thanks for your enthusiastic responses! For those of you who still would like to contribute, it is not too late to do so. We are also looking for more small items that symbolize your country or region of origin. Thanks to Barbara White for putting this display together.
