

**VETERINARY TECHNOLOGY APPLICATION
FOR CURRENT PURDUE STUDENTS
(WEST LAFAYETTE CAMPUS ONLY*)**

INSTRUCTIONS: *PURDUE STUDENTS* currently enrolled at West Lafayette who are applying for the Veterinary Technology Program must complete this form before receiving the blue supplemental Experience Report. This form will be forwarded to Nancy Oliver, Admissions, who will activate the student's file from the central records. (Admissions should have high school records, TEST scores, and an admissions application on file for most Purdue students. However, you may be asked to provide additional information such as a complete high school transcript.)

Course selection for the spring semester will continue in the student's current major and school. The student's current enrollment will not be affected until he/she is offered admission (February) in the Veterinary Technology program for the summer term (June). If the student accepts this offer of admission, then the CODO process will be automatic to transfer the student into the Veterinary Technology Program beginning with the June term (the student does not have to complete the CODO forms.)
